Crossfield, Alberta

MATRIMONIAL

The home of Mr. and Mrs. George Bennie was the scene of a pretty wedding when Jean Mohat, daughter of Mr. and Mrs. J. R. Mohat of North Battleford, Saskatchewan became the bride of their son, Geo. Bennie of Crossfield.

Pink and white streamers and silver wedding bells against a background of ferns and chrysanthemums formed the setting for the ceremony which was performed by Rev. C. W. Anderson of the United Church. The bride, in the absence of her parents was given in marriage by Emerson Walroth of Crossfield and wore a floor length dress of ivory tulle, a full length veil with a coronet of orange blossoms and carried a bouquet of deep red roses.

Mrs. Archie Bennie was maid of honor and Mr. Archie Bennie, brother of the groom was best man. During the signing of the register Mrs. M. Charney sang "Because".

Following the ceremony a reception was held at which the bride's table was centered by the wedding cake and pink carnations. Mr. Anderson proposed the toast to the bride and groom.

The bride's going-away suit was dark-brown with a corsage of roses. After a short honeymoon the young couple will reside on the farm of Mr. and Mrs. Geo. Bennie of Crossfield.

LOCAL NEWS

Mr. Anhorn is driving a new car.

Mr. Fitzpatrick of the Atlas Lumber Co. was a visitor in Calgary this week.

J. Heskech is in Glenelch attending his brother's wedding.

Fred Collins has left Woods Garage to drive for F. T. Baker.

Extra copies of the Chronicle obtainable at Edlund's Drug Store.

Mr. and Mrs. Don Cameron have returned from Banff.

Bob Stewart and Doug. Howard are big game hunting at Cowley, Alberta.

Max Ish who has been driving for John Larson left to work at Leduc.

Hank Fryke is back in the hospital at Calgary.

The Meadows Red Cross group will meet this Wednesday of each month.

Remember folks! If you have anything to sell or want to buy, advertise in the Chronicle.

W. J. Wood has accepted two new school buses for the Calgary School Division.

John Larson has left the employ of F. T. Baker and is driving his own truck.

Bill Taylor is back from Rimby and is now employed in the C.P.R. ticket office.

Roy Bills, Roy Sackett and Scotty Callie returned from a motor trip of two weeks spent in Sunny California.

Mr. Everett Noonan of Norderge and his bride left for their home on Wednesday after spending the past two weeks with his sister and brother-in-law Mr. and Mrs. Chas. Duggan.

The annual meeting of the Crossfield Fish & Game Association will be held in the curling rink on Sunday, December 14 at 2 p.m. All sport minded persons are invited to attend. It is hoped a good turn out will be there.

The Committee for the Community hall will meet in the town hall Tuesday, December 16th at 8 o'clock sharp.

Mr. and Mrs. Doug Robinson of Calgary were week-end visitors to the home of the latter's parents, Mr. and Mrs. Lee Ableman.

The Old Timers' service was certainly well attended on Sunday November 30th. The sermon of Rev. Anderson was well chosen and the assistance of Mr. Mumby representing the Anglican church was most appreciated. The Old Rugged Cross" rendered by the men folk of the Old Timers' Association made one wonder why such talent could not be enjoyed every Sunday.

The Crossfield Fish & Game Association held their turkey shoot with the members up from the Calgary Club also. Well over one hundred turkeys and geese were disposed of despite the bad weather. At the trap shooting some very good shots were in attendance, proven by the number of birds taken away, many having three or four. It seems as if much more success would be attributed to the shoot if they were started earlier in the day.

Discuss Hall Project

A very successful meeting was held in the Co-op hall on Monday evening when some forty enthusiastic met to consider ways and means of building and financing a new community hall. Mrs. Wilda Charney was chairman of the meeting and called for a report from the committee appointed at the last meeting to obtain particulars of similar projects in other centres.

In answer to an enquiry a letter had been received from the Department of Public Works stating that there were no government grants for this purpose. Mr. H. Munby gave an outline of the hall at Barons and it was generally agreed that something along the same lines would be in line with our needs. The cost of this hall was in the neighborhood of \$47,000, but it is probably a larger hall than would have to be built here.

After considerable discussion on site, shape, location and costs it was agreed that a committee should be named to go ahead and formulate plans for raising the money and looking into plans.

The following committee was appointed: and were given authority to add to their number anyone the thought could help.

W. O. Murdoch, P. Lant, W. A. Hurt, Hector McDonald, E. Hopkins, T. Aslett and C. Becker, the first named to be chairman, with Mrs. Charney as secretary and R. Barnaby and H. May as publicity committee.

The above committee met after the above meeting and plans were drawn up to appoint a canvassing committee early in the new year, but any one wishing to make a donation can do so by contacting either one of the above named.

The objective for the drive is necessarily high for everyone knows that a large hall at present costs will be plenty, but it can be done if everyone will do their share.

Everyone admits that Crossfield needs a good community hall, and while we are building it might as well be good, but we shall all have to dig down to put it over.

The members of the young adults group served a delicious lunch to all present and announced that their group would meet next at the United Church parlor on January 15th.

Another meeting of the hall committee will be held on Tuesday December 16th in the town office. The thanks of the gathering go to the manager and directors of the Co-operative Association for providing the hall for the above meeting.

TO ALL SUBSCRIBERS

As I have taken over this paper and all subscriptions, I would appreciate any due subscriptions being paid up. It is my intention to give the town and district a first class paper and to do this I need all subscribers and help that is possible in news gathering. Consider this subscription matter now and if there is any news you wish in the paper or any comment to make it will be appreciated by the Editor.

The Elbe Red Cross members are in the Christmas spirit. A meeting was held at the home of Hilda Milner on Wednesday last with a good crowd present. Xmas gifts were exchanged.

One of the members had the misfortune to stub her toe at the party, consequently could not take part in the games. A delicious lunch was served and everyone had a wonderful time.

A very successful basket social was held at the Meadows school on Saturday last. Approximately \$40.00 was raised for the children's Xmas fund. Jean Laut had the misfortune to break two bones in her ankle during the games.

Mrs. Callie and family will arrive this week to join her husband.

A. D. Stevens was a visitor in Calgary on Tuesday.

Alterations have been taking place around the teller's desk at the local bank.

Mrs. J. Thompson, Sr., received unexpected congratulations over the air on her birthday.

Mr. and Mrs. Baker of the local bank left Tuesday for Drumheller having been transferred there.

Remember to pay your subscription.

A local number of shirts are in Banff for two weeks taking in thrills of the slope at Mt. Norquay.

Fred Wilson of Dugout is a patient in the Calgary General hospital where he is undergoing an operation for gut.

Mrs. L. LaBoucane of Vegreville is employed at the Olive Cafe.

Curling is now in full swing at Crossfield.

I phoned my wife in Calgary last night and they charged me ten cents amusement tax. I guess the government still has a sense of humor.

The weather of the past week has remained quite cold although not much below zero. Stock on the open range are looking well.

Mr. and Mrs. J. P. McIntosh and family and Mrs. Smythe, Mrs. McIntosh, Mr. and Mrs. H. Rounbough of Calgary were Sunday guests of Mr. and Mrs. W. Aldred.

The executive of the Crossfield Old Timers' Association wish to thank any and everyone who contributed in any way to help make the round-up a success, especially to the Ladies Aid and Mr. Mumby's Olive Club and all the entertainers and to Mr. Geo. Jones, the convenor of decorations.

The Ladies Aid wish to thank all who so kindly donated food and chicken, dishes and utensils to help serve the banquet and would like to say there are many dishes in the basement of the church to be collected. If you are unable to find your, phone Mrs. Garnet O'Neill, president.

The Good Neighbors Club held another party at the home of Mr. and Mrs. H. H. H. on Saturday evening with Mrs. H. H. H. as hostess. Prizes went to Mrs. H. H. H. and Mrs. Aldred and the consolation to Mrs. G. Poynter and Winifred Bailey. A delicious lunch was served by the hostess winding up an enjoyable evening.

A very well attended whist party was held in the Masonic hall December 4. Fourteen tables of whist were played. Although it was a little late starting everyone was quite pleased.

If May started the ball rolling raffling a pair of nylons and a few packs of cigarettes in a way which amused all present. Prizes were won on the raffle by Mrs. J. H. H. H. Mrs. B. Lilley, P. Ruddy, H. McIntyre. First prizes were won by W. D. McCool, P. Sackett, E. McChimmon and R. E. Barnaby. Consolation went to Mr. and Mrs. W. J. Wood, H. McIntyre and H. Fitzpatrick.

The ladies of the district served a very delightful lunch and want to thank all for the fine spirit and splendid co-operation.

Music Lessons

Mrs. M. Cutler of Calgary wishes to announce that she will hold a tuition class in Piano, Violin, Vocal and Guitar at Crossfield, providing a sufficient number of people are interested.

A Threat Of Disaster

A NUMBER OF FACTORS ARE CONTRIBUTING to the present, unstable world conditions. Clashes in political ideologies are receiving a great deal of attention, and equally alarming are the threats of widespread economic disaster. A report recently made public in Washington by the international Emergency Food Council warned that "the twin problems of food and dollar shortages could result in world economic collapse, if not chaos." Thirty-five nations are represented on this council, which serves mainly as an agency to allocate scarce foods fairly in areas where there are serious shortages. The report, which dealt with the present world food situation, was far from encouraging and carried a strong note of warning against impending disaster.

Less Food But More People

Attention was drawn to the fact that there are now 200,000,000 more people to feed than there were before the war, but in spite of this, food production is now ten per cent. less than the per capita world production before the war. In addition, due to a decline in the food output in some countries, the supplies this year are from two to three per cent. less than those of last year. Less grain, hay and potatoes were produced in Europe this season, while there was a decline in the corn crop in the United States. At the same time, smaller food crops were produced in India and several other countries which import much of their food supply. It was also reported that Europe is "desperately short of food for its livestock at a time when that continent is striving to rebuild its livestock industry."

Supplies Sent From Canada

As a remedy for the approaching crisis the report suggested the utmost in co-operation, both national and international, in the matter of producing and distributing food. It is distressing to most people to realize that while the food consumption per capita on this continent is the highest in the world, in some parts of Europe and Asia it is at near starvation levels. Canada has contributed largely to the world food supply during the years when the need in Europe and Asia has been so great, and the grain, meat and other supplies sent from here have provided relief in many distressed areas. This continent is one of the few sources of abundant food supply in these times and it is so hoped that, in co-operation with other-producing countries, means may be found of averting a collapse such as the Emergency Food Council warns us may now be impending.

Quickly Relieves Distress of Sneezy, Stuffy Head Colds

A little Vapo-nol on each nostril promptly relieves sniffling, stuffy distress of head colds, makes breathing easier.

Also gives prompt relief from developing colds if used in time. Try it! You'll like it! Follow directions in package.

VICKS VAPOR-NOL

WOULD LEAVE ONLY BUGS TO INHERIT EARTH

PALM ALTO, Calif.—It is highly unlikely that mankind can be wiped out by atomic radio-activity, according to Dr. Douglas M. Whitaker, Stanford zoologist who was a member of the Bikini atom bomb expedition.

However, he said in an address, if mankind is destroyed so will be other forms of animal life, leaving bugs to inherit the earth.

TOO MUCH STRAIN

It is said that the rich are more nervous than the poor because the wide variety of choices available permits them keeps them in a state of indecision. Indecision is a strain on nerve-control mechanism.

Do female functional monthly disturbances make you feel nervous, fidgety, cranky, so tired and 'dragged out'—at such times? Then try Lydia E. Pinkham's

Lydia E. Pinkham's VEGETABLE COMPOUND

FUNNY And OTHERWISE

Dinah: "Has you made all arrangements for your marriage, Mandy?"

Mandy: "Well, not quite all, Dinah. I's got to buy a tuxedo, an' get mah husband a job, an' rent a house, an' buy mah husband a good suit of clothes, an' get some regular washin' work to do. An' when them's done, Ah kin name the happy day."

Writing in a daily paper, a woman says she has not seen her husband for 11 years and wonders what she should do about it. He should be patient. He may have taken up golf.

The soprano seeking an engagement was finding the booking agent a trifle dubious.

"How many years in grand opera did you say?" he queried.

"Forty."

"My, my, you must have known Madame Butterfly as a mere caterpillar."

Cyril: "You may spurn me, but remember I shall not always be a clerk at \$20 a week."

Marie: "That's just the trouble. You may lose your job at any time."

Adam Clark, a well-known theologian and commentator, was an early riser.

A young minister wanted the eminent minister to tell him how he managed it. "Do you pray about it?" he asked.

"No," was the reply. "I just get up."

MacLanish: "I hear yer friend Angus has married a third wife."

Elder: "Aye, Angus is an expensive friend; two wreaths an' three presents in seventeen years!"

Husband: "What extravagance! you have two hats to match that one dress."

Wife: "Oh, no. I haven't. I've only one dress to match the two hats."

The family and their guest had just seated themselves at the table.

"Betty," said the mother, "why on earth didn't you put a knife and fork at Mr. Green's place?"

"He doesn't need any, mummy," replied Betty. "You said he eats like a horse."

When the visitor was shown into the manager's private room he remarked:

"That new clerk of yours seems a hard worker."

"Yes," replied the other, "that's his speciality."

"What, working hard?"

"No, peeing to."

Vegetable Compound to relieve such symptoms. This fine medicine is very effective for this purpose! For over 70 years thousands of girls and women have reported benefit. Just see if you, too, don't report excellent results! Worth trying.

NEAR TRAGEDY, BUT EVERYONE IS HAPPY NOW — Snatched from her crib unconscious from greasy smoke, caused by an overheated oven, five-month-old Linda Smith is shown with Mrs. Elsie Wellman, who saved her; Mrs. Smith, her mother, and Mrs. C. Yendit. Family lives in emergency housing near St. Catharines, Ont.

Western Briefs

KELOWNA, B.C.—Kelowna School District No. 23 is starting a school construction program following passing of by-law authorizing \$578,250 for a new high school.

LAC DU BONNET, Man.—Manitoba's provincial air service is experimenting with dropping supplies by parachute to isolated settlements in the northern part of the province.

EDMONTON.—An animal pathology building is to be erected on the University of Alberta farm for the exclusive use of the department of agriculture. The \$50,000 building will be of frame and stucco construction and is expected to start immediately.

PORTAGE LA PRAIRIE, Man.—The Portage branch of the Red Cross society is offering something new to the people of this city in the form of a loan cupboard of sick room supplies which will be made available to any family in the city when such supplies are required. This announcement was made by executive member of the Portage branch.

ROSETOWN, Sask.—Tired of people getting him up at night, James C. Maines, who has an apt name for a chap who sells tires, developed a slot machine so they could help themselves to two pairs for a nickel. Slot machines generally are a rarity in this province and one that peddles waste is still more rare to anybody except the people who live in Rosetown where they have been putting a nickel in a slot to get something to drink for the past 20 years.

RECIPES

CHOCOLATE FUDGE

2 squares unsweetened chocolate
¾ cup milk
2 cups sugar
Dash of salt
2 tablespoons butter
1 teaspoon vanilla
Add chocolate to milk and place over low flame. Cook until mixture is smooth and blended, stirring constantly. Add sugar and salt, and stir until sugar is dissolved and mixture boils. Continue boiling, without stirring, until a small amount of mixture forms a very soft ball in cold water (233 deg. F.). Remove from fire. Add butter and vanilla. Cool to lukewarm (110 deg. F.); then beat until mixture begins to thicken and loses its gloss. Turn at once into greased pan, 8x4 inches. When cold, cut in squares. Makes 18 large pieces.

SWISS HOT SOUR MILK

4 cups (1 qt.) sifted flour
1 tablespoon baking powder
1 teaspoon soda
1½ teaspoons salt
4 tablespoons corn meal
2 eggs, well beaten
2 cups sour milk or buttermilk
2 cups sweet milk
2 tablespoons melted shortening
Sift flour once, measure, add baking powder, soda, and salt, and sift together into bowl. Add corn meal and mix.
Combine eggs and all milk and add to flour mixture. Add shortening. Then mix only enough to dampen flour.
Bake on hot, greased griddle. Serve at once on warm plates with butter and syrup. Or serve with jam. Makes about 2 dozen griddlecakes.

THE SHORTEST NAME

LONDON.—A newspaper columnist's claim that the 1x family of New Jersey, U.S.A., had the shortest name on record was challenged by Tom Oz of Canning Town, London, who wrote: "My full name has only five letters."

Most of the camphor now used in North America comes from southern pine trees.

Immigrants To Canada Total 32,028

Decrease Of 14,226 From Corresponding Period Of Last Year

OTTAWA.—A total of 32,028 immigrants came to Canada from various countries during the six-month period ended Sept. 30, but the figure was 14,226 below that for the corresponding period of 1946, the resources department reported.

The decrease might be traced to the dropping off of heavy movements of dependents of servicemen from overseas.

Meanwhile, another department announced that that year the arrival in Canada of 863 displaced persons aboard the S.S. General Stewart, the total number of displaced persons entering the Dominion so far will be raised to 5,757.

Of the latest number, 1,385 are people brought to Canada under the provisions of the close relatives scheme, 113 are orphan children being adopted by families in all parts of the country, and 4,259 are workers admitted in groups in response to requests by Canadian industry.

Of the 4,259 workers, 3,439 have been engaged by lumber companies, 595 are domestics who have been employed in institutions and homes, 100 are textile workers, 500 railroad workers and 75 miners.

However, Belgian, Danish, Dutch, Finnish, French, German, Icelandic, Norwegian, Swedish and Swiss immigrants totalled 3,809 compared with 3,732.

From all other races came 4,570 immigrants compared with 1,277 a year ago.

The 32,000 total for this year was broken down as follows: adult males, 13,771; adult females, 12,071; children, under 18, 6,186.

Destinations by provinces of the immigrants to Western Canada, most of whom were farmers, unskilled, semi-skilled or skilled workers, trading class workers, miners, and domestics, was:

Ontario, 17,566; Manitoba, 1,213; Saskatchewan, 1,997; Alberta, 1,687; British Columbia, 4,299; Yukon Territory, 21; and Northwest Territories, six.

To Feel Right — Eat Right

Beat This! Retrieves More Than He Lost

VIROQUA, WIS.—County Clerk Berlie Moore was on his way to a bank with a bundle of \$1,100 in currency and cheques when:

The rubber band broke on the bundle.

Bills and cheques flew up and down Main street in a stiff wind.

Volunteers retrieved the flying paper, and Moore, after tabulation, said he wound up with \$3 more than he had when the money took flight.

Grandmother Knows What Brings Quick Relief

Since her own childhood grandmother has known Dr. Chase's Syrup of Linseed and Turpentine to be a dependable and quick relief for coughs, colds, bronchitis and similar ailments. Is it any wonder that she sees that there is always a bottle of it at hand in case of emergency. Quick action is most important when colds set in.

BRIEFLY TOLD

R.A.F. cultivated gardens produced food worth £100,000, (\$400,000) in 1946.

W. J. Richardson, 35, who in 1880 sold the first typewriter to Queen Victoria, was a visitor to a business efficiency exhibition in London.

A hangar with floor area of nearly eight acres and three doors, each 300 by 64 feet, has been built for Britain's largest civil airliner, the 125-ton Brabazon 1.

Possibility of ships sailing the seas propelled by atomic energy within a year or two, was predicted recently by Dr. H. J. Bhabha, chairman of the Indian atomic energy board.

Poplar logs are being used in South Australia for manufacture of plywood because of timber shortage. It has been found suitable for such items as furniture and frames for caravans.

Malaya is importing a specially designed lighthouse from England to replace the temporary one guiding ships into Klang Straits. Its light is supplied from three diesel-driven dynamos.

Mrs. Natalie Wales Paine, founder of "Bundles for Britain" during the Second World War, received the award of Commander of the Order of the British Empire from Baron Inverchapel.

Christmas Seals

By E. L. Ross, M.D., Medical Director Sanatorium Board of Manitoba

Last year more than 5,000 Canadians died of tuberculosis, 324 of these in Manitoba. We are in the habit of congratulating ourselves on the fact that tuberculosis has been pushed from first to seventh place as a cause of death. While we may be thankful for this progress we should not forget that tuberculosis is the greatest cause of death between the ages of 15 and 45 years and with life expectancy being roughly 65 years, you can see how wasteful this disease is in life years and these the most productive years. Such facts are regrettable since tuberculosis is curable and can be prevented and curbed to such an extent that it could become a very negligible factor in the health picture.

How can this be done, you ask? It can be done by finding all the cases of tuberculosis that exist at present and providing treatment for them until they are no longer infectious.

Tuberculosis is a secretive disease. It does not blazon forth its symptoms until the mischief is well advanced. Cough, expectoration, tiredness and loss of weight, when due to tuberculosis, usually means disease that is more or less advanced. This results in the necessity for prolonged treatment and increases the probability that the germ has been passed on to someone else in the family or community. The only means of wiping out tuberculosis is prevention, which is based on the discovery of sources of infection at an early stage. This can be done by the "all-seeing eye" of the x-ray.

Within the last few years the development of x-ray equipment that takes pictures on miniature films has made it possible technically and financially to x-ray the whole population. Besides travelling clinics the Sanatorium Board now operates continuously two large bus-like mobile x-ray units each x-raying a thousand people daily. In Manitoba this year these units have x-rayed 250,000 people. During the past four years over 600,000 people have had chest x-rays and a first survey of the province outside of Winnipeg has been completed. One in 5,000 x-rayed is found to have tuberculosis that requires treatment or advice. In January an organized and comprehensive survey of the City of Winnipeg will begin and continue until every part of the city is covered.

This intensive and greatly increased program to discover new cases early and seek out unknown sources of infection is financed by the Christmas Seal Sale and the fund-raising activities of the Associated Canadian Travelers. It is essential that this service be continuous if our goal of tuberculosis eradication is to be accomplished. To realize this an even greater public response through the Christmas Seal Sale is needed. Money thus raised is used entirely for prevention; not one cent is spent for hospitalization. Sanatorium treatment is free to the individual requiring it and financed by taxation.

I appeal to all citizens to support generously the Sale of Christmas Seals being conducted for the support of travelling clinics and mass x-ray surveys. Every case of tuberculosis discovered early prevents the infecting of an untold number of others. You can be a partner in the campaign against tuberculosis by buying Christmas Seals.

Scooter Riders Killed In Crash

Struck by a car while driving a motor scooter, Norman Russell Johns, 18, of Sarnia, died in hospital. Scooter and car met head-on at busy intersection.

Louise Ann Brown, 17, was passenger on scooter. Taken to Sarnia hospital, she died a few minutes after admission. Driver of auto told police he swerved to avoid hitting another car.

Postman Jailed For Courtship

LONDON. — A lovesick postman has been jailed for trying to court the unwilling daughter of a peer. Short, bespectacled Richard Harrison, 34, who delivered mail to the home of Lord and Lady Norton of Fillingley, Warwickshire, fell in love with Hon. Mary Norton, 25, and took to walking into his Lordship's hall unannounced to ask her to go for walks.

A week ago Lord Norton obtained a court order banning him from the mansion for life. Accused of violating the order, Harrison was ordered committed for contempt of court. When the court asked what excuse he had, he replied: "I'm in love with His Lordship's daughter—that's sufficient cause."

During the great earthquake of 1811 the Mississippi river temporarily flowed north.

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

Study Strain

Warning against eye-strain comes from Ottawa. Health authorities urge the provision of sufficient light for close work and study. They point out that continuous eye-strain can undermine general health. Artificial light, they say, is bad for the eyes only when it is too weak or creates glare.

If one is suffering from hot or tired eyes, blurred vision or dull headaches, it is suggested that the family doctor be asked to check the eyes to ensure that sight is right. It is pointed out that modern developments in the field of ocular science afford easy relief for eye troubles.

Baby Teeth

Irregular teeth, which ruin the appearance, literally have their roots in childhood. They may be due to neglect of baby teeth, to such child habits as thumb-sucking or lip-biting, or to mouth breathing due to adenoids or other nasal obstruction, to retaining baby teeth longer than normal or to neglect and loss of the first molar on the second set.

Dental officials at Ottawa advise regular twice yearly examinations to enable dentists to off-set such conditions.

Squinting

No matter how young a child is, he should be given special medical attention if he squints. Medical authorities declare that squinting which develops in infancy should be investigated and treated. If left too long, the vision in the squinting eye may be lost through disuse. This, the experts say, is very likely to occur if nothing is done before the age of five or six years is reached.

A rubber sponge is a wonderful help: it's excellent for brushing suede shoes, and makes a grand "brush" for removing dust and lint from hats and clothing. Excellent for corduroy and velveteen.

THIS CURIOUS WORLD BY WILLIAM FERGUSON

LITTLE REGGIE

PRISCILLA'S POP—Quick Change

I've sent Priscilla upstairs and said you'd be up to speak to her! She's been a little demon!

Luck Of One Prairie Farmer

One Canadian prairie farmer who stood to profit mightily by the lifting of ceilings on barley was Oscar Bruce Lausier of Lethbridge. He had taken a big gamble in June when, having lost one stand of barley to cutworms, he decided to reseed 2,500 acres to the same grain. It was tough and got all through September and early October; a killing frost would have blighted his crop. But the unseasonably warm weather compensated for the late summer drought which had delayed the ripening of the "80-day" grain.

Recently, with combines taking an average of 25 bushels from every acre, "O.B." Lausier was collecting a jackpot. The first seeding had cost about \$6,000, the second \$7,000, and the harvesting would run to \$10,000. With barley bringing growers around \$1 a bushel (delivered at a nearby elevator), Lausier was pretty sure of a \$40,000 gross profit. Under the ceiling it would have been only \$25,000. Said a neighbor, in admiration and envy: "He sure took a chance."—Time Magazine.

ALMOST AN ENGLISHMAN

Napoleon narrowly missed being born an Englishman. England and France had been warring about the possession of Corsica for several years, and it was just a few months before Napoleon's birth, in 1769, that the controversy was settled in favor of France.

CANADA'S POTATO CROP DOWN

Ample Domestic Supply, But No Export Surplus

OTTAWA. — Canada's potato crop this year will be sufficient only for domestic needs, leaving no surplus for export to Britain, where a shortage has necessitated potato rationing, agriculture department officials said.

One official placed this year's Canadian crop at 72,000,000 bushels, down nine or 10 per cent. from 1946, and said increased exports would only have the effect of boosting domestic prices as well as creating shortages here.

In any event, he added, the amount of potatoes Canada might send to Britain in an emergency would make no difference to rationing in that country. The newly-installed potato ration has been placed at three pounds weekly for each consumer.

Last year a quantity of Prince Edward Island potatoes was sold to Britain but the British Government was not anxious to take more at that time because of stringent British regulations governing the importation of fruits and vegetables.

This year's Maritime crop is mainly seed potatoes, leaving little in the way of a surplus for export. The seed crop, however, is adequate and there will be a substantial export of Maritime seed potatoes to many parts of the world.

Bone Bank To Aid The Crippled

The Latest In Joining Blood, Skin And Plaster Bones For Saving Human Life

NEW YORK.—Bone banks preserving human bone are being used successfully to aid the crippled, the injured, and victims of some diseases.

They are the latest such savings accounts of human spare parts, joining eye banks, skin banks, blood banks and plasma banks. The bone banks use deep freeze refrigeration to keep the material fresh and ready for use.

The pioneering work at two New York hospitals has just been disclosed after more than 1,500 operations. Some of these used bone preserved as long as three months.

The operations were so successful that the bone bank idea now is spreading rapidly to other hospitals, and formation of community-wide banks is urged by Dr. Philip D. Wilson, surgeon-in-chief of the hospital for special surgery here.

Dr. Wilson reported 60 successful transplants, and Leonard Bush of the New York Orthopedic hospital said excellent results were obtained in 67 operations there. These two hospitals began the bank simultaneously about a year and a half ago.

Pieces of healthy bone obtained in operations or from amputations are placed immediately in sealed, sterile jars, and stored in a refrigerator at temperatures of 10 to 20 degrees below zero Fahrenheit.

Care is taken to avoid bone from persons who have had syphilis, malaria, or recent tuberculosis. The organisms causing these diseases might lodge and survive for long periods in the bones.

Advantages of the bone bank, the surgeons said, are that it avoids the time, pain, and shock of supplemental operations to take bone from the leg or hip of a patient for grafting elsewhere. It also avoids weakening and possible fracture of the area from which bone is borrowed.

Bone from the bank has been used to fill cavities, caused by tumors or accidents, with fresh bone, to fuse or join joints of the wrist or spine, and to bridge small gaps in fractures or injuries. Vertebrae of the spine have been fused to prevent collapse in low back pain cases, or to permit complete rest in tuberculosis of the spine. Bone also can be used for plastic surgery to demold jaws or noses.

Prairies May Soon Grow Sugar Maples

If the tests being carried out at the Dominion Experimental Station at Morden, Manitoba, to evolve a strain of sugar maple suitable for the prairies are successful, all Canada may become a land of maple. The Land of the Maple, the leaf of the Sugar Maple is Canada's floral national emblem, but unfortunately this valuable tree, esteemed alike for its beauty and utility—its sugar sap and way-grained furniture wood—is a native of only a part of Canada, and while it grows as far south as Georgia, it does not extend far north in Canada. The western boundary of the Canadian Sugar Maple appears to be in the Thunder Bay Hills flanking Lake Superior.

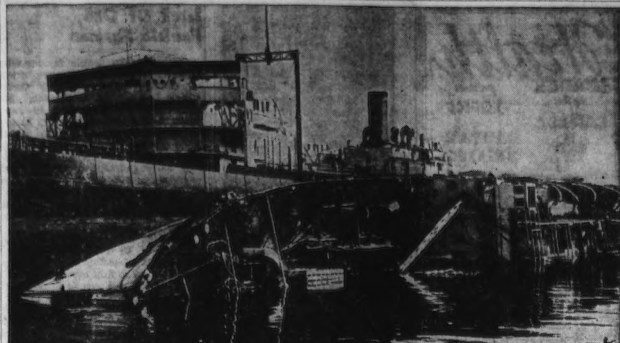

Tests at the Morden Station show Sugar Maples raised from seed obtained in Ontario and Quebec are too tender to withstand the rigours of severe winters. The seed obtained from the Thunder Bay Hills near Fort William are so far doing well and produce seed. However, a strain from Northwest Minnesota is expected to prove superior, because throughout the ages the parent trees have been subjected to prairie heat and low moisture supply. Seed has been harvested from native trees east of Morden, Minnesota, and also from two Stations from trees of Thunder Bay parentage. Morden has shared this seed with other Dominion Experimental Stations, Universities, and Forest Services across the Prairies. It is hoped that the resulting seedlings will prosper and that in time Canada will be more widely and fully the Land of the Maple.

KEEP WHEELS TURNING

The New York Times says more than half a million business concerns—or one-sixth of all business concerns in the United States—are based on the manufacture, sale, service or use of motor vehicles, the Automobile Manufacturers' Association reports. They employ, in round numbers, 8,200,000 persons, about one out of seven persons employed in the country.

DEFINITIONS

Economist—A man who plans what to do with money that isn't his.
Optimist—A man who gets tired by a lion but enjoys the scenery.
Widow—A woman who no longer finds fault with her husband.
Parasite—A man who goes through a swinging door on someone else's push.—Coronet.

GREEK SHIP OVERTURNS IN BRITISH HARBOR, INVESTIGATION ORDERED—Mysterious capsizing of the 8,000-ton Greek ship Matrona at Birkenhead, Eng., is being investigated by the authorities. The ship, formerly English, seen lying on her side in the harbor, turned over at her dock. There were no casualties, as those aboard her left the vessel when it became obvious that her mooring lines would part.

Society Aims To Outlaw Fox Hunt

National Society For Abolition Of Cruel Sports Claims 90,000 Backers

LONDON.—Claiming the support of 90,000 Britons who hate "killing for fun," the National Society for Abolition of Cruel Sports has set out to outlaw fox hunting, traditional English sport.

E. G. Barlow, the society's secretary, announced the government would be petitioned to promote other sports as illegal as legislation making fox hunting and once popular bear baiting and cock fighting.

He claimed "more than 300" of Britain's 64 members of parliament had promised to back a proposed anti-hunting bill and that a country-wide supporting petition now being circulated had collected 90,000 signatures.

This threat to a sport which epitomizes England to generations of scarlet-coated "riders to hounds" drew immediate opposition from the British Field Sports Society which predicted a "March on London" by indignant fox hunters if the measure goes before parliament.

"The farmer won't stand for it—it would mean the end of everything an Englishman enjoys," declared James W. Fitzwilliam, secretary of the society.

He warned that the measure, which also would ban hunting and coursing of deer, otters, badgers, hares and rabbits, would "create a row," and "the farmers are livid."

Fitzwilliam's forecast of a mass demonstration followed publication of a pamphlet by Barlow asserting that fox hunting was not only cruel but "anti-social" and "sabotaged the poultry industry at a time when the country was short of food."

Barlow depicted English fox hunters as blood-thirsty "playboys" practicing "a sordid and ugly sport which has long been covered with a veneer of romance" and "sabotaged the poultry industry at a time when the country was short of food."

"Practise up, playboys," he wrote, recalling the Soviet Communist organ's April 20 comment that "Britain cannot afford a state of affairs in which millions of acres lie fallow and merely serve the need of the hunt."

(The Pravda observation was made when a British delegation under Harold Wilson was in Moscow negotiating for Russian food.)

Both Barlow and Fitzwilliam denied that political beliefs were involved in the current fight, the former saying "we try to avoid class distinction."

Barlow listed "some of the worst cases" of cruelty as the hunting of pregnant vixens and the pursuit for miles of terrified stags. Foxes customarily were dug out of earth and hung alive to hounds to be torn to pieces, he alleged.

"It is customary and correct," Barlow said, "to smear the faces of children at their first hunt with the blood of the hunted fox."

LEARN TO RELAX

Nothing worthwhile is accomplished without effort, which means, in many cases, tension of mind as well as of body. Young people returning to schools and colleges at this time of year are reminded of that by health leaders, who ask students to bear in mind that they need adequate sleep and relaxation if their minds are to be fit for classroom work, as well as equipped for the tasks which lie ahead. Nature's antidotes to fatigue are rest, sleep and relaxation, the medicals remind Canadians. They are essential in relieving the strain of sustained effort.

India has the largest irrigation system in the world which waters 70,000,000 acres. 2752

Gave Instructions In Modern Terms

This story appeared in Reader's Digest: "You sit at this table, Miss Jones," the foreman of a large local factory instructed a girl who was starting a job as instrument-tester. "Put these headphones over your ears. Turn this rheostat handle until you hear a distinct oscillation, then place the amplifier diaphragm over these five points on the piece you are testing. If the oscillations are interrupted, the piece is to be rejected."

The girl looked blank. "I don't get it, boss. You'll have to come again."

The foreman had a modern daughter himself. He changed his style. "Well, honey, here's the dope. You put these doohickies over your ears and turn this gimmick till you're on the beam. Then you put this gadget over these thingamajigs. If the noise runs off the groove, the job is not sold. Now are you pep?"

This time she was.

SOUNDS LIKE GOOD IDEA

According to the Edmonton Journal the Dominion Department of Justice appears to be considering a substitute juror system for Canada. Extra jurors would sit with the regular jury, and if a juror should be unable to continue one of the substitutes could step into his place. Thus there would be no necessity of starting the trial all over again.

Shakespeare was the father of twine, Judith and Hamnet.

Editor Retires With \$50,000 Bank Account

The editor of a small Alberta country newspaper retired recently and moved to the city, there depositing in the bank \$50,000. For 30 years he had been publishing the small-town paper and retired with this amount to his credit.

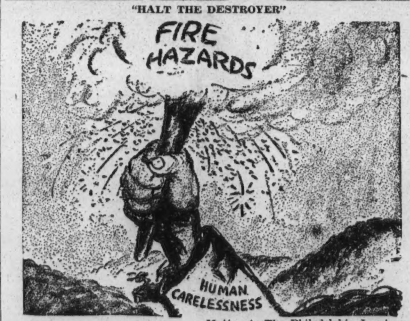

He was asked for the secret to his financial success. He replied: "After 30 years on a country newspaper I attribute my ability to retire with a \$50,000 bank account to the following:

- (1) Close application to work.
- (2) Always heaving to the mark and allowing the chips to fall where they may.
- (3) Following the most rigorous rules of economy.
- (4) Never spending a cent foolishly.
- (5) Everlastingly sticking to the job with a whole heart, and
- (6) To the death of an uncle who left me \$49,999.50.

BRITISH MINER SETS RECORD IN DIGGING COAL

LONDON.—Edwin Greenleaf, 37, South Wales miner, broke all records by producing single-handed 320 tons of coal in a week. Mine officials were amazed by his feat, which beat the previous British record by at least 40 tons.

To Feel Right — Eat Right

—Hutton in The Philadelphia Inquirer

WIFE LEARNS BITTER TRUTH—TEN YEARS LATER—Leaning forlornly against a tree, Mrs. James Robert Collins waits to visit her husband at the county prison at Doylestown, Pa. There he told her for the first time that he had escaped in 1936 from an Alabama prison, where he was serving a life term for a fatal bank hold-up. They were married 10 years ago and have two children. Collins was apprehended recently following a tip-off by Alabama authorities. Behind her, (right), Collins writes to his wife and children.

Early Experiment In Town Planning

Famous English City Of Bath Was Beautiful

After the Romans left Britain, the baths of ancient Bath became ruins covered with dust and rubble. It was not until 1881 that they again saw light of day, for they were literally dug out. But a century before great things had been happening at Bath. People had found that its waters were good for rheumatic diseases. It became a centre of fashion. Around the baths a Pump Room was built where fashionable men and women, who went to revive after the pleasure and fatigues of the London season, flocked daily to drink the waters. Stately halls were held in its beautiful Assembly Rooms. Incidentally these were destroyed during the last war in air-raids. Bath always had a Master of Ceremonies and the most famous of these was Beau Nash, the friend of the Prince-Regent who was afterwards George IV. Beau Nash was called the "uncrowned king of Bath" and he laid down laws for the conduct of visitors to the Assembly Rooms. The city owed its revival to a Cornishman Ralph Allen, who had made his fortune carrying mails for the Post Office. He spent it all in Bath and gave the architects Wood, father and son, an opportunity to lay out a most beautiful city. They erected squares, circuses and terraces with lovely houses of classical proportions which are delightful to look at. It was an early and most successful experiment in town planning. There were few famous people who lived in Britain in the late 18th and early 19th centuries who did not go to Bath, "to take the waters" as it was called. One of the most observant visitors was Jane Austen, but she mirrored the life in Bath as she saw it in "Northanger Abbey."

Home Insulation Aids Indoor Comfort

It will pay home owners to hunt out cracks and crevices that let cold air penetrate into the house while permitting warm air to escape. Use of proper insulation materials and methods to prevent outdoor air from entering the home greatly aids indoor comfort in homes equipped with a winter air-conditioning system as well as reducing fuel costs from 20 to 25 per cent.

Loose window frames and door jambs will not permit cold, dry, and soot-laden air to enter the home but will allow conditioned air from within the home to pass to the outside. Heated air, a primary factor of indoor comfort air conditions, is also affected by conduction through uninsulated walls, floors and ceilings.

By caulking cracks in the window frames and installing weather stripping or tightly fitting storm sashes on windows and doors, and placing insulation material in the walls, floors, and ceilings, home owners will obtain the utmost results from their indoor comfort systems.

In homes not fitted with air-conditioning equipment, attention should be paid to the matter of ventilation. Don't shut off all sources of fresh air in the desire to preserve heat.

Experiments with an anti-grasshopper spray may point the way to new and more effective control methods. Developed in the United States, grasshopper poison can be applied more easily than the bulky bait now in use. But officials here say exhaustive studies for possible toxic effects on livestock and humans and for efficiency in killing grasshoppers under prairie conditions must be made before widespread use is recommended here.

Although an outbreak is forecast over most of western Saskatchewan, the most serious infestations are expected south of Moose Jaw and Swift Current. In scattered tracts stretching towards the international border.

Experiments with an anti-grasshopper spray may point the way to new and more effective control methods. Developed in the United States, grasshopper poison can be applied more easily than the bulky bait now in use. But officials here say exhaustive studies for possible toxic effects on livestock and humans and for efficiency in killing grasshoppers under prairie conditions must be made before widespread use is recommended here.

WOMEN ARE INVITED TO JOIN ROYAL NAVY

LONDON.—Women for the first time were invited to join the peacetime Royal Navy. The Admiralty announced that an estimated 10,000 women who served with the Royal Navy during the war and had a good record of at least 12 months' service would be eligible to join a Women's Royal Naval Reserve. Full civilian status would be given with knowledge of the navy to be called up in the event of any future emergency.

Saskatchewan Prepares For The 'Hoppers

Agriculturists Fear A Serious Outbreak On The Prairies Next Year

REGINA.—The most serious plague of grasshoppers since 1940 when the voracious insects caused crop damage officially estimated at \$14,000,000 in Saskatchewan alone—swept the prairies this year and agriculturists fear an even more serious outbreak next year.

Dominion government entomologists report millions of adult grasshoppers swarming in stubbled fields and grassy ditches and although final surveys are not thrice completed—they are now making a survey of grasshopper egg-beds—present indications point to many more next year.

Next year's infestations will not be as serious as those of the early '30's when whole crops of wheat and corn were devoured and the prairies and pastures were after acre of grain, but staggering losses threaten farmers who fail to take control measures, agriculturists say.

Despite the widespread drought across in Saskatchewan, with conditions made to order for the stubble grasshopper, the most prevalent species this year is the roadside grasshopper, which thrives on grassy roadsides, pastures and fields.

Already the provincial department of agriculture is preparing poison bait, a mixture of sodium arsenite, sawdust and bran which kills hoppers when spread thinly over infested areas. The bait will be distributed next spring to farmers who have been warned to check their farms for eggs immediately.

Proper tillage will destroy eggs in fields or confine adult grasshoppers so they can be more easily poisoned. But the roadside grasshoppers can be dealt with only by an effective use of poison bait in likely places.

Agriculturists say that while climatic and soil factors control the numbers of grasshoppers, the periodic plagues are partially man-made. The fight against grasshoppers is a perennial one, and if control measures are neglected for one year, they will be that much more difficult the next year.

Although an outbreak is forecast over most of western Saskatchewan, the most serious infestations are expected south of Moose Jaw and Swift Current. In scattered tracts stretching towards the international border.

Experiments with an anti-grasshopper spray may point the way to new and more effective control methods. Developed in the United States, grasshopper poison can be applied more easily than the bulky bait now in use. But officials here say exhaustive studies for possible toxic effects on livestock and humans and for efficiency in killing grasshoppers under prairie conditions must be made before widespread use is recommended here.

Bird Described As A Small Miracle

The Montreal Gazette says: A bird is a wonderful thing. To see one rise, wheel in the air and soar into blue space, as refreshing as a cool sea breeze.

It sails the skies, circling easily and buoyantly. Its tireless wings know no fetters. Earth lays little claim to it. For this is a creature of immensity.

Yet earth is lovelier for its presence. Woods are brightened by the flicker of its wings, skies quickened by its graceful flight and hearts gladdened by its rapturous song. A bird is, perhaps, a small miracle. It is cared for by a hand that guides it with unerring skill to its distant summer home; a voice that whispers when it tilts its head to listen; and a presence that fills its tiny being with joy.

STEPLADDER ONE OF COMMONEST DANGERS

The stepladder is one of the commonest tools but it is also a danger to life and limb, the National Safety Council was told by F. B. Berglund of the Patent Scaffolding Co., Chicago. Safety in its use depends upon its design, construction and freedom from injured parts. It should be covered with linseed oil, not paint, the latter making it difficult to inspect. Instruction in the proper use of ladders, he said, is an important factor in reducing accidents caused by ladder falls.

ONE PATIENT'S CHOICE

The doctor's waiting room was full. Every chair was taken; some patients were even standing. There was a desultory conversation but after a while a silence fell. The patients waited. Finally, an old man stood up wearily and remarked: "Well, I guess I'll go home and die a natural death."

Water plays a large part in the regulation of body temperature through evaporation from the surface of the body.

Deep River, "Atomic Town", Is Canada's Newest Model

By-product Of The \$20,000,000 Atomic Energy Plant At Chalk River Is Notable Experiment In Housing

(By Reginald Hardy in Ottawa, Canada)

By-product of Canada's \$20,000,000 atomic energy plant at Chalk River, the model town of Deep River, on the shores of the Ottawa, some 130 miles northwest of the Capital, stands today as Canada's most successful experiment in the field of modern urban housing.

Began in 1945 to house the scientists, government officials and all others engaged in the construction and maintenance of the highly-secret atomic energy plant which came into full production early this spring, the town quickly spread over the pine-clad slopes of the Ottawa River.

Because all who worked on the atomic plant were sworn to secrecy, and because security measures had to be taken to ensure a black out of what was being accomplished, the army of workers and technicians had to live unto themselves. But first they must have homes. They must have recreational facilities, a theatre, bowling alleys, tennis courts, skating rinks, a library. They must have a school for their children, a hospital, stores in which to buy their food, clothing, furniture, an hotel to accommodate the scores of scientists and other experts who must come and go. They must have a bank, a post office, a cafeteria and a coffee shop.

The experts put their heads together and the job was given to Defence Industries Limited, the Crown Company building the atomic energy plant itself. A site was chosen, plans were prepared and within a few weeks giant bulldozers, concrete mixers, ditch-digging and road-building equipment—all the other implements of the modern construction industry—were moved in. Building material arrived by the train-load. Top priority was given to every phase of the work, and within a matter of months the town, complete, from its modern hospital and central heating plant to its paved, boulevarded streets and beauty salon, had become a reality. To hasten the job many prefabricated homes no longer required at the great aluminum plant at Arvida were dismantled, shipped to Deep River, and there reassembled.

Today the town has a population of close to 1,600. Nobody knows just how much it has cost the government, because its cost was included in the cost of the atomic plant itself. It need not be taken therefore, as an example of low-cost housing.

But it certainly does stand as a model of what small Canadian municipalities can be if they start from scratch and are intelligently planned. It may well become the prototype for scores of other towns which may spring up in many parts of the Dominion.

Until only recently the town of Deep River was itself in security zones. Today, however, the gates are open and anyone may drive down from the highway, visit for an hour

or a day, or put up at the town hotel for as long as he cares to. The Chalk River atomic energy plant, hidden in the deep pine woods along the shores of the Ottawa, will continue to secrete area. But the people of Deep River are now free to come and go as they please, and their fellow Canadians may visit them at will.

It may be that at some future date Deep River will become an incorporated municipality. But for the time being it is administered by the National Research Council. The nearest approach to a chief magistrate in charge of the atomic energy project, administers the affairs of the settlement. A group of officials under Dr. Keyes collects the rents, supervises the operation of the hotel, hospital, recreational centre, looks after public works and attends to all the other business of the town. If roomy lack of ideas they can borrow from the town's 1,800 inhabitants, some 1,000 of whom are classed as scientific personnel.

But let us take a quick tour about town. Leaving the main highway we walk down a pleasant parkway bordered by giant pines. We catch a glimpse of the river sparkling in the autumn sunshine. The mountains on the far shore, the river itself, the long strip of golden beach that runs the whole length of the town, all these form a typically Canadian backdrop for the settlement. A moment and we find ourselves on the town's main street or "square", a long boulevarded rectangle about which are grouped the hotel, the community centre, the stores, the hospital, the school, the cafeteria, etc. From this "square" the residential streets radiate like the spokes of a wheel. Pleasant and comfortable these wartime houses, have plenty of windows, spacious lawns, and are surrounded by trees.

Take a saunter through the recreational centre. To the left is the coffee shop, just opposite is the hotel. Down a flight of steps is the entrance to the theatre where the latest movies are shown each week and where the town's study groups and other social and cultural organizations hold their meetings. Opposite still under the same roof, is the rear of the building opens on to a wide expanse of field where football, baseball and other sports are played. The farther and there is the beach. Sailing dorys are moored a little distance from the shore, canoes are neatly stacked up in the boat house. No one in Deep River has to leave town to enjoy a vacation.

If the idea of decentralization ever catches on widely, thousands of Canadians will some day be able to live like this, far from the rear and the bustle of the commercial centres, divorced from the bustle of crowded thoroughfares and slum-breeding areas.

WALLACE IN BETHLEHEM—While touring Europe in search of material for his journalistic activities, Henry Wallace, former cabinet member and ex-vice-president of the United States, visited the Bastille of the Nativity, reputed birthplace of Christ, in Bethlehem. Brother Camillus Liaka, a Franciscan from Houston, Tex., is showing Wallace a reliquary containing pieces of the true cross.

THE SPORT WORLD

Mexico City—"Ducks, Unlimited," United States and Canadian waterfowl conservation organization, have formed a Mexican committee to fight commercial duck slaughter here and to protect duck havens in Mexico, southern end of the great flights that start in Canada and go over the United States.

On a talent hunting trip, **Los Angeles** told the boys that Maurice Richard, Milt Schmidt and Max Bentley compare favorably with hockey greats of all time. For an all-star team, the Big Train liked Roy Worters in goal, Eddie Shore and King Clancy on defence and Howie Morenz, Bill Cook and Schmidt on the attacking line.

Winnipeg—Officials of the Manitoba Amateur Basketball association are planning a new deal for supporters of the cage game in this province. At present they have their sights aimed on furthering basketball throughout Manitoba in general. In the past the game has been mainly dominated by Winnipeg teams and interests.

Chicago—Jackie Robinson, New York first baseman for Brooklyn Dodgers, was announced as the "rookie of the year," selected annually by the Chicago Chapter of the Baseball Writers Association of America. Robinson, first of his race to make good in major league baseball, edged out Larry Jansen, New York Giant hurler, for the honor.

London, Ont.—Members of Canada's Summer Olympic team will sail for Britain about July 10. Professor Nelson C. Hart, vice-president of the Canadian Olympic Committee, said here that the team had been named general manager and publicity director of the Summer Olympic team and revealed the names of other officials.

Calgary—Delegates to the annual meeting of the Western Canada Softball association decided to adopt almost completely the rules of the American association with the main change the lifting of all restrictions on the pitcher. There will be no leadoff from any of the bases and nine-man teams will be fielded. Playoffs in the men's and women's divisions will start to get with the women's team starting in the east and moving west.

Chicago—A plan to suppress the internal wall, baseball's most irking stratagem to the average fan, by making it worth two bases, has been proposed by Jack Sheehan, director of the Chicago Cubs' farm system. Sheehan also proposed a restricting catcher's box which would force the pitcher to throw the ball somewhere within the vicinity of the plate against all hitters. "I've done considerable traveling in the past few years," explained Sheehan, "and listened to a lot of fan. Most of them griped about the purposeful pass. 'They come out to see the big guys hit.'"

National Hockey League Have 52 Players From Western Canada

Twice As Many Fucksels Born In Winnipeg Than Any Other City

Twice as many National Hockey League players were born in Winnipeg, Manitoba, than in any other city in the world. After checking the birthplaces of the 102 current players it is found that 12 of these players first saw the light of day in Winnipeg. Toronto is the next most productive city, having raised six National League players.

Winnipeg, a city of less than half the population of Toronto, has long been the most fertile field for developing major league hockey players. Montreal has been the birthplace of eleven players, while Saskatoon, Saskatchewan, has four of its native sons performing in the National Hockey League.

Many Canadian cities, among them Saskatoon, Toronto and Montreal, have developed many players presently campaigning in the National League, but when it comes to actually being the birthplace of the greatest number of National League players, Winnipeg wins hands down.

The Province of Ontario leads all Canadian Provinces in the production of players, with 34 N.H.L. players being born in Ontario. There are 24 Saskatchewan-born players dotting the lineups of the six clubs, while Manitoba-bred pucksters total 18. Quebec has 10 native sons in the League, Alberta has six, and Nova Scotia one. There isn't a single player in the League who was born in either of the three remaining Canadian provinces—New Brunswick, Prince Edward Island and British Columbia.

Four of the present N.H.L. players were born in the United States, with Evielet, Minnesota, being the birthplace of two of these. "Frigid Frank" Brimsek, Boston Bruins' great goalkeeper and Johnny Mariucci, captain of Chicago Black Hawks, were born in Eveleth, Pelee Island, Ontario. The classy-looking rookie wingman, was born in Brashear, Pennsylvania, while Bill Moe, New York Rangers' rugged rearguard made his debut into the world at Danvers, Mass.

Four players were born in Great Britain—two in Scotland and one

Carbon Monoxide Hazard To Everyone's Safety ::

A hazard of safety in both home and industry is the odorless gas known as carbon monoxide. This gas is a deadly poison and gives no warning when breathing there it strikes. If ventilation is insufficient carbon monoxide (CO) can contaminate the air either from the burning of fuel gas or solid fuels with improper drafts. Headaches, fatigue and dizziness frequently are caused by the deadly fumes but such symptoms may arise from other causes the victims may not attach significance to them.

In addition to the home hazards from stoves, furnaces and grates, the following occupations are particularly exposed to monoxide: garage workers, motor vehicle drivers, chemical plant workers, blast furnace workers, welders, foundry workers, blasters and miners, some types of garment workers, kiln workers and others in the glass and pottery industries, some phases of printing, various other technical work such as blacksmiths, firemen, plumbers and so on.

When CO enters the lungs it deprives the vital organs of the necessary oxygen. Death really takes

place from suffocation. The odor of other fumes is usually associated with CO and gives a good reason for analysis of the fumes. Fresh air is required at times in the case of headaches and medical services immediately when the poisoning is more serious. The Department of National Health and Welfare suggest in addition to fresh air, to keep the victim warm and quiet; if breathing is weakened or stopped, apply artificial respiration. Speed is essential. Such an employee should never return to his job before medical examination.

The best preventive is to keep the air free of CO. This is true in the home as well as industry. Closed cars also provide a danger. In the house, furnaces, stoves and grates should be inspected regularly by competent workers. No one should enter closed places in which CO may be trapped until thorough ventilation has taken place or without proper respirators. Above one part CO in 10,000 parts of air by volume is dangerous. Carbon monoxide is so deadly that everyone should be on guard for himself and provide warnings for others.

Jack Miner And The Birds

The new enlarged Memorial Edition of "Uncle Jack's" book contains over 300 pages—fully illustrated—and would make a wonderful gift for members of the family.

Because Jack Miner did so much good with his pioneering of bird banding and his bird sanctuary at Kingston, Ontario, where thousands of birds land and feed during their migration flights this paper has always been a favorite of Uncle Jack's—as he was known to many thousands in Western Canada through his lecture tours.

As much as 15,000 people a day visit his bird sanctuary during the spring and fall—and now that Jack has passed on his sons, headed by many, are dedicated to continuing his work—still without any fees or remuneration.

The publishers of the Memorial Edition are the Copp Clark Co. Ltd. of Toronto and they have done an excellent job of printing and binding if you cannot get the book through your local store write to Copp Clark for a copy—it will be read and re-read by all the family and your friends.

When the geese come back in the Spring And they learn that their friend has gone I wonder they take to wing And try to follow him on!

When they look for their friend again As they've done in the years before, Will they stay with us who remain Or seek him the wide world o'er?

They loved him, the young and the old, Wid' geese and the whistling swan! What then, when the flocks are told The man who was kind is gone? There were hunters where he roved, Now, they'll grieve for the friend they knew

When the birds come back in the Spring. —(Tribute by Edgar A. Guest)

Big Deals Are Not Always Money Makers

Noel Coward sold the film rights of his play, "Tonight at 8.30," for eighty thousand dollars. The U.S. taxes on the sale amounted to \$26,758. The British taxes amounted to \$42,604. The agent's fee of ten per cent, was eight thousand dollars on the deal. The total of the taxes and fees paid by Mr. Coward was \$85,362. So he lost eight thousand dollars on the deal. It would have been cheaper for him to have given the rights of his play away. When you hear people who think are making a lot of money squawk about taxes don't be too hard on them. They may have some good reasons for the complaint.

Visitors Get Lost In Box Hedge Maze

The gardens at Hampton Court near London are among the loveliest in England. Several have been there since Tudor times, 400 years ago, and are full of old English flowers. And there is the famous box hedge maze which is 200 years old. People make a small fee to enter and there have some fun trying to find the exit. It is not uncommon for visitors to walk wildly, and definitely, through the box hedges for hours before calling for help. The keeper obliges at once, of course, but he usually has trouble in trying to hide his grin.

The rose was the favorite flower of rulers of Greece and Rome and was used as a symbol on their banners and shields.

TO USE SCREEN IN PLACE OF PULPIT FOR EVANGELISM

NEW YORK—The Protestant church has for a long time used the silver screen as a more effective, more subtle and more persuasive form of evangelism. It is now being supported by 19 major Protestant denominations, the Protestant Film Commission presented in 100 cities in the United States and Canada, London, Melbourne and Manila the first full-length motion picture, "Beyond Our Own," ever sponsored by a church group to depict a fictional film, made in Hollywood.

Twelve other films along the same lines, without religious messages, pictures carrying a moral—will be produced within the next nine months. Each will cost between \$100,000 and \$300,000, about the usual cost of a Hollywood "B" picture.

The picture tells the story of two brothers, one a lawyer primarily interested in amassing a fortune, the other a doctor who becomes a medical missionary in China. The lawyer's son is killed in an automobile accident and in his despair the lawyer joins his brother in China, where he sees the purpose of his brother's selfless career. The lawyer then returns home to participate fully in the work of the church.

The picture was given a "meek" preview recently at a Springfield, Mass., movie house, after a gangster film. Response was favorable.

The Tragic Story Of Dr. Ayer—

From the first issue of The Stayer Sun we glean the following bit of ADVERTISING:

The insanity of Dr. J. C. Ayer of Lowell affords a terrible warning to advertisers. Here was a man engaged in manufacture of a pill, not different much from a hundred other pills which may be obtained at any drug store. In his advertising campaign he made up his mind that he would advertise, not in the pleasure of the ordinary dealer, but in a comprehensive sort of way, so that he could reach every possible purchaser of pills. He started with the idea of defying half of his profits each year to advertising.

The result might have been foreseen. He accumulated money so rapidly that he did not know what to do with it. When he held together \$150,000, and had valiantly striven to find some outlet for his ever-increasing profits, his mind gave way under the absorbing cares of his business, and he is now a patient at an asylum for the insane. How easily this calamity might have been avoided! If he had stuck to the conservative methods of many merchants and refrained from advertising, he might have been passing quietly through bankruptcy now, instead of being laid down with his uncounted millions.

It is a dangerous experiment for a man that does not want to become rich to advertise; or, if he advertises at all, he must advertise grudgingly and at long intervals, lest he should find himself burdened with wealth. Advertising, contended on the principal of devoting half the profits of a business to it, is, we repeat, a dangerous experiment. It plunges a man into a vortex of pleasures and pleasures, and he is so suddenly that the chances are even he will not know what to do with his money. The man who advertises, and who is not a miser, is almost sure to meet a note are permanently denied to the man who advertises.

There never was a man in Europe or America a great advertiser who did not accumulate a great fortune. Let those who desire to live unburdened by the cares of wealth take warning.

To Feel Right — Eat Right

Fishtail Peplum

7178

This lovely embroidery motif is the simplest type to do. The princess line flatter in newest, most popular of blouses. Easy sewing too! Pattern 7178; embroidery, transfer; blouse pattern in Misses' sizes 12, 14, 16, 18, 20. State size.

Our improved pattern—visual with easy-to-use charts and photos, and complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents in coin (change cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 270 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Helpful Hints

To clear clogged sink-drains place a piece of soda on the perforated strainer in the sink, and pour vinegar on it.

What should you do if a person mispronounces your name? Let it go if you are not likely to see the person again; if you are, explain that it is a hard name to pronounce and correct him or her.

When you finish your box of bath powder don't throw away the puff. It can be used for many little cleaning jobs, for instance, on white shoes. The puff is thick enough to prevent the polish from getting all over your hands and in your nails, and if there is a white ribbon on it, slip this over the bottle. It is always ready, and you don't have to locate a small cloth that is easily lost.

Might Do Away With Need For Highways

The Lethbridge Herald says: May be we were building along these expensive highways. This is suggested to us by a report from Seven Persons saying that a district resident flew his private plane to town, collected some groceries and mail and flew home again. Perhaps this is prophetic of what lies ahead though we're a bit inclined to doubt games the automobile. A little the conveyance will disappear so readily. However, the plane incident is another nail in the coffin of Old Dobbin.

Smile of the Week—

The proud father, was talking about the intelligence of his son. "You know, dear," he told his wife. "I think he must have got his brains from me."

"He certainly must have done," retorted his wife. "I've still got mine."

Old Timer's Celebrate in Grand Manner

The Crossfield and District Old Timer's Association held its annual round-up on November 26th. The whole affair, comprising banquet, entertainment and dance was a huge success in which close to 275 people enjoyed themselves. The banquet held in the United church parlor served its first tables at precisely 8 p.m. and continued to serve till 9 p.m. This was catered to by the Ladies Aid, and was unsurpassed with an abundance of roast turkey, cranberry sauce, chicken salads, vegetables and pies of every make.

After the banquet the crowd seated themselves in the Co-op. hall to enjoy the entertainment.

The program commenced with "O Canada"; the address of the President Frank Laus who welcomed all present in a warm and courteous manner which is typical of our own Frank.

J. McCool spoke on behalf of the Northern Pioneers and after bringing the customary greetings soon had the audience in kinks of laughter which always occurs when John is present. Mr. Leitch and Mrs. McNeil brought greetings from the Southern Pioneers and complimented the association on having Mr. Laus as president. To quote Mrs. McNeil "He is one of the most beloved men of Alberta."

Mr. Mumby, principal of the Crossfield school acting representative from the Anglican church, in a few well chosen words addressed the Old Timers as did Rev. Anderson and Father Tessier from the United and Catholic churches respectively.

The "Coyote's Howl" of last year graduated with honors into the "Anvil Chorus" of this year and this group of men brought down the house with its

Post Office Department, Ottawa.
FRIDAY, DECEMBER 12th, 1947

old time songs. The group was comprised of Doug Hall, Dr. Williams, J. Luman, Bert Lilley, Len Beddoes, Louis Ellis, and Charlie Hampton with Miss Audrey Brooks as pianist.

Mr. Beddoes favored the audience with two appreciated solos and, Miss Joan Copley, daughter of a pioneer sang very sweetly "The Last Round-up" and for an encore "Little Grey Horse in the West", accompanied by Mrs. Wilks Charney.

Ken Borbridge and Walter Lilley with saxophone and piano accordion rendered some duets of bygone days. Mrs. O'Hann gave a Swedish rendition of a wedding which was very humorous, and brought forth many side-splitting laughs. Mrs. Bert Lilley told of the Baptists' first Bonspiel. The Crossfield Glee Club under Mr. Mumby's capable leadership is to be congratulated on the lovely selections it rendered for the Old Timers and certainly divulged the fact that Crossfield has willing workers with wonderful talent.

During the program the customary two minute silence for departed members was observed. Before closing the annual Church service for the following Sunday which was to be held in the United church this year with Rev. Anderson officiating. He also announced the annual meeting to be held on the last Saturday of January and invited all present to be back to the next Round-up.

The floor was then cleared and the "Round-upers" Old Time Orchestra set the pace for several hours of good old time dances.

The general comment seemed to be that all in all, it was a wonderful night for it was co-operation and the good old spirit. The hall itself was ablaze in a band of color and beauty and surely its old walls were bursting with pride under gay streamers, colored balloons, tinsel, cowboy pictures, the wonderful and original "Welcome Old Timer" cards with various old time brands on display around its timely greeting.

This work was accomplished by Mrs. Geo. James decorative artist of Crossfield assisted by Mesdames Vera Scholfield, Borbridge and Ruddy and a few good-friend-lubbers.

Hockey Schedule

At an organizational meeting in Carstairs on Tuesday night of last week officers for the newly formed Rosedale intermediate hockey league were elected.

This Weber of Carstairs heads the league as the president; Sam Miller of Oids is the vice-president and Sam Devine of Carstairs is the secretary.

The league executive includes besides these officers Grant Field of Bowden; F. N. Miller principal of the O.S.A.; Stan Hodgson of Oids; C. Scott, Didsbury; L. Leisener, Carstairs; R. A. Sackett, Crossfield and H. Earle of Cremona.

The league schedule has now been drawn up and it includes seven teams.

Games scheduled are —
December 11th — Oids Elks at Cremona
December 12th — O.S.A. at Carstairs
December 15th — Oids Elks at Crossfield
Bowden at Didsbury
O.S.A. at Cremona
December 18 — Crossfield at Bowden
Didsbury at Oids Elks
December 22 — Cremona at Oids Elks
Didsbury at Bowden
Carstairs at Crossfield
December 27 — Crossfield at Cremona
Carstairs at Oids Elks
December 29 — Carstairs at Didsbury
Bowden at Cremona
January 5th — Oids Elks at Carstairs
O. S. A. at Crossfield
Cremona at Bowden
January 8th — Cremona at O. S. A.
Didsbury at Crossfield
January 12th — Cremona at Didsbury
O. S. A. at Oids Elks
January 15th — Oids Elks at Bowden
O. S. A. at Carstairs
Crossfield at Didsbury.
January 18th — O. S. A. at Didsbury
Cremona at Carstairs
Crossfield at Oids Elks
January 22nd — Cremona at Crossfield
Didsbury at O. S. A.
Carstairs at Bowden
January 26th — Carstairs at O. S. A.
Bowden at Oids Elks
January 29th — Oids Elks at Didsbury
Carstairs at Cremona
O. S. A. at Bowden
February 2nd — Oids Elks at O. S. A.
Crossfield at Carstairs
Didsbury at Cremona
February 5th — Didsbury at Carstairs
Bowden at O. S. A.
February 9th — Bowden at Crossfield

**Yes Kiddies, There is
a Reddy
Kilowatt!**

Yes, there really is a Reddy Kilowatt. He exists as certainly as modern comforts, conveniences and economies of electric service exist . . . and you know how real they are and how much they add to the enjoyment of living. There are some who say he cannot be but they are affected by the scepticism of a sceptical age. They think nothing can be which cannot be seen.

Nobody sees Reddy Kilowatt, but then who has seen Santa Claus coming down the chimney? Just as Santa symbolizes a beautiful feeling of goodwill and of giving to others, so does Reddy Kilowatt stand for all the many wonderful things that electricity accomplishes for humanity.

You could tear apart your electric meter but you would find only wheels, gears and wires. You wouldn't see Reddy Kilowatt but without him those wheels wouldn't turn and the wires leading to your lamp and appliances would be without purpose.

Life would indeed be dreary without Reddy Kilowatt. It would be as dreary as though there were no little children. There would be hard, back-breaking work to do . . . many hours of toil to tire and try the patience.

Yes, there is a Reddy Kilowatt! Thank goodness he lives, and lives forever. A thousand years from now he will continue to make glad the hearts of people and make lighter their everyday burdens.
